

**ORAL PHARMACEUTICAL COMPOSITIONS OF FENRETINIDE HAVING
INCREASED BIOAVAILABILITY AND METHODS OF USING THE SAME**

Abstract

5

The present invention provides an edible composition for oral delivery of an active agent such as a retinide. The composition comprises, in the form of a dry flowable powder: (a) an active agent such as a retinide; (b) lipid matrix composition; (c) optionally sweetener; (d) flour. Compositions of the invention may be
10 administered *per se* or mixed with a solid or liquid food carrier, for direct oral consumption by a subject or administration through a feeding tube.
